Re: Grease in storm box at  
Jefferson and Elm

In response to a call on 6/22/77, informing this office of the above situation, Stephen Short and I found City personnel attempting to clean the clogged storm sewer. The substance blocking the drainage was indeed grease. The blockage was cleared by a flusher. However, we were unable to determine the exact source of the grease. The storm box is directly in front of the White Mill Restaurant. Stephen Short contacted employees there and found that they had sewer problems about a month ago and that Grant Sewer Service had cleaned grease in their lines. It is possible that the grease was dumped there on purpose. We have no proof one way or the other.
